# **MTI Wireless Edge Announces New Low Cost 5.15-6.0GHz 29dBi Semi Parabolic Grid Antenna**

**MTI Wireless Edge is proud to announce the availability its new 5.15-6.0GHz 29dBi, 2x3 feet, high quality, low cost, light weight, aluminum die cast, semi parabolic grid antenna.**

**Tel Aviv, Israel. February 19, 2008.** This antenna is the first of a whole new MTI product line of this type of antennas. In the pipeline MTI also has similar antennas in other frequency bands such as 3.3-3.8GHz.

MTI's new Low Cost 5.15-6.0GHz 29dBi Semi Parabolic Grid Antenna is a suitable solution for Point-to-Point (PtP) radio links as well as for remote Point-to-Multipoint (PtMP) and WiMAX subscriber end. This antenna's very light weight and very low wind resistance make it ideally suited for installation on any tower type structure. The installer friendly mounting kit allows for simple installation and easy pointing of the antenna with short installation time. Unlike some other similar product in the market, the MTI antenna is completely weather and environment proof with UV, rust and salt atmosphere protected to provide an extended outdoor operational life time under extreme weather and environmental conditions .

Dov Feiner, CEO & President, MTI Wireless Edge Ltd is quoted as saying. "We are very excited with this new product line and will be adding other similar antennas to our traditional flat panel antennas portfolio in order to strengthen our one-stop-shop position. Our aim is to take a major share of this market".

The new antenna is planed according to the 35 years legacy of MTI of bringing high quality along with low cost. For this reason the new grid antenna is high quality die cast as well as very light weight.

### **About MTI Wireless Edge Ltd.**

MTI Wireless Edge is a world leader in the development and production of high quality, low cost, flat panel antennas for WiMAX, Fixed Wireless and RFID applications. MTI has more than 35 years experience in supplying antennas for both military and commercial applications from 100 KHz to 40 GHz. MTI flat panel antenna range includes base station, subscriber and omnidirectional antennas for all broad and narrow band WiMAX and fixed wireless applications in both licensed and unlicensed bands. MTI Military products include a wide range of broadband, tactical and specialized communications antennas, antenna systems and DF arrays installed on numerous airborne, ground and naval, including submarine, platforms worldwide.
